LIVESTOCK AND COMBO TRAILERS

SIMPLY THE BEST

Endura: The best built stock and combo trailer on the market!

Why does the industry view the Endura as the best built trailer you can buy?

Endura's unique double-walled construction reduces unsightly dents on the inside from showing up on the outside of the trailer, thus maintaining the beautiful smooth exterior of your Endura for years after tough use.

Plus, cleaning out the Endura is a snap. The elimination of stakes and side posts, smooth interior walls and floor extrusions that run parallel from front to back, easily channels waste out the rear of the trailer.

Using proven high-performance structural adhesives commonly used in the aerospace industry, the Endura's horizontal tubes are bonded to each other creating a trailer side that essentially performs as a single structure with many times the strength of conventional stake sided trailers.

Proven Technology - Proven Performance - Proven Value - ENDURA, Simply the Best!

Endura Customer, KS.

"I'm from Clay Center, Kansas, and I own two Hillsboro Endura stock trailers; one is 17 years old and one is 14 years old. We've had no issues with them and use them a lot. If I was ever going to buy another stock trailer, I would buy an aluminum Hillsboro Endura trailer!"

Endura Customer, MO.

"I'm from Cameron, Missouri, and bought my first Hillsboro aluminum trailer five years ago. I liked it so well my brother went and bought one. We have been very happy with them!"
